

collaborate onsite create offsite

a tale of two sites

Novick Consulting strives to work accurately and effectively to deliver exceptional customer process management consulting... better.

NovisMethodsm prescribes a proven framework to collaborate, onsite and create, offsite.

Onsite, Novick Consulting works, closely, with your teams to extract and capture essential information, facilitate workshops and review conclusions. And, offsite, it creates all of the artifacts for change in a focused and structured environment.

This new way of working assures you that Novick Consulting provides the best customer process management consulting experience, while reducing unnecessary travel costs.

evolve around your customersSM
